To make the SketchUp interface work is much easier, you have to use plugins. And they can make that interface more user friendly, so it becomes easier for SketchUp users to interact with SketchUp. The only problem is that they arent all bundled up into a plugin kit like they used to be before. However, that doesnt stop you from knowing how to install plugins and extensions of your own. The Difference Between Tools, Plugins, & Extensions When referring to Sketchup. Tools are anything that is built into the Sketchup software. Plugins are extensions and tweaks that enhance the functionalities of Sketchup. However, they can also take up a lot of space on your hard drive and cause the files to grow in size. Unlike extensions, plugins arent meant to be used by the user, but rather by SketchUp. They are meant to be used by Sketchup staff. Plugins are sort of like a plugin kit on steroids.
